To: Hiring Manager, The Digital BA

Subject: Application for AI Internship - Remote Position

Dear Hiring Manager,

I am writing to express my strong interest in the AI Internship position at The Digital BA. As a final-year Computer Science Engineering student at IIIT Delhi with extensive experience in machine learning and AI development, I am excited to contribute to your mission of creating impactful and accessible digital solutions.

AI Expertise & Research Experience

My passion for AI is demonstrated through impactful projects aligning with your internship requirements. I developed a **Plant Disease Detection** system using ResNet-50, achieving 96% accuracy and implementing PyTorch Mobile for offline inference—showcasing accessible AI solutions that support your value of **Accessibility**. My research on **Gendered Abuse Detection in Indic Languages** involved CNN-BiLSTM-Attention architectures with XLM-RoBERTa embeddings, demonstrating AI research capabilities and commitment to **Accountability** in technology's social impact.

Problem-Solving & Innovation

Through my **AgriPredict** project, I exemplified **Boldness** by tackling agricultural challenges using ensemble ML methods (Random Forest, XGBoost) achieving 98.9% accuracy. I applied advanced preprocessing, feature engineering, and created intuitive Streamlit interfaces. My experience spans complete AI development lifecycle—research, analysis, implementation, testing, and documentation—directly matching your internship tasks.

Technical Skills & Collaboration

My technical foundation includes Python, PyTorch, machine learning frameworks, and data analysis tools essential for AI-driven software development. I demonstrate strong independent work capabilities while maintaining accountability, and my collaborative experience shows commitment to fostering **Belonging** within teams. Working with mentors like Prof. Arani Bhattacharya across multiple projects, I understand the value of knowledge sharing in small, passionate teams.

Why The Digital BA

I am drawn to The Digital BA because your values align with my technology development approach. Your **Accessibility** commitment resonates with my work making AI available to diverse users—from farmers using offline disease detection to multilingual abuse detection systems. Your **Accountability** emphasis matches my belief that AI developers must consider broader societal impact.

The opportunity to work in a dynamic team environment contributing innovative ideas while learning from experienced mentors is exactly what I seek. I am eager to bring my AI research passion, problem-solving abilities, and collaborative spirit to help shape accessible and responsible AI technology.

I am confident my proven AI development experience, research capabilities, and alignment with your company values would make me valuable to The Digital BA team. I welcome discussing how my technical skills and innovative mindset can contribute to your exciting AI projects.

Thank you for considering my application. I look forward to hearing from you.

Sincerely,
Himanshu Kumar
